Agricultural University of Tirana

ELISAA

ELISAA Project is financed by the European program EACEA (Education, Audio-visual and Culture Executive Agency) - "Tempus". Its main aim is to build up a higher and vocational training in the agricultural sector as a result of the development of agro- industry in Albania, and this will be realised through an e-learning course which is focused on no-food uses of biomass (agricultural crops and residual biomass) in particular for the hypothesis of bio-fuels generations. The project provides the use of e-learning platform capable of managing classes in a comfortable way from home. In the framework of this project it is planned a qualification seminar in Bari (Italy) for 14 days (Autumn 2014).
