

From strategic consulting to UX Research & Design, from mobile development to smart solutions based on Artificial Intelligence, we are part of some of the most important business transformation projects in Italy and internationally. Assist Digital is composed of people who have the passion of their trade and believe in the value of their resources to grow and propose innovative solutions.

We are creating a Multi-Competence Team in Tirana and we are looking for a

Senior iOS Developer

What will you do?

Your main objective will be the design and development of mobile applications for iOS platforms, actively participating in discussions and technical decisions. You will be an integral part of the development and maintenance of our extraordinary mobile applications.

Our team is looking for full-stack mobile developers who drive and innovate through our mobile products.

Who are you?

You are a high school graduate or a university graduate, preferably in computer science and have gained 3/5 years of experience in the role of ICT services companies where you participated in significant development projects, relating to one or more digital channels (web, mobile ...) and various industries: Telco, Banking, Travel, Utility.

You have the following requirements:

- Experience with iOS technologies and development tools (Objective-C, Swift, Xcode, Cocoapods)
- Knowledge of the architectures of mobile applications in native and hybrid contexts
- Experience of integration with web services from mobile applications (REST with JSON, HTTP, HTTPS, OAuth)
- Work experience with SCRUM and AGILE methodology.
- 2+ years of full-time development experience on iOS in the professional field
- Knowledge of the mobile application development cycle
- Capacity for requirements analysis and technical feasibility studies

These knowledge / experiences would be appreciated:

- Experience with open source libraries (AFNetworking, SDWebImage, JSONModel or others)
- Knowledge of systems and tools for source and CI control (git, gitlab, SourceTree, Jenkins)
- Experience with other mobile development platforms (Android, Windows Phone, Cordova, Xamarin)
- Experience with web technologies (HTML5, JavaScript, jQuery, AngularJS)
- Experience with at least one scripting language (Python, JavaScript or others)
- Have published personally mobile applications on official stores
- Fluent knowledge of the English language.
- Knowledge of the Italian language will be a Plus.

The ideal candidate must also be motivated towards counseling as a professional choice, mentally open, curious, with enthusiasm and energy, with excellent communication skills both in writing and in oral presentation.

Available for work trips.

What do we offer you?

A path of growth aimed at enhancing skills. A stimulating work environment where you will have the opportunity to express your passions and increase your skills by working on challenging projects, together with a motivated and passionate work team.

Assist Digital in 2017 obtained the certification as Great Place to Work in Italy.

The research is aimed at candidates of both sexes.
