Communication skills

Throughout my studies and during my professional practice, as well as at the university where I work, I have developed excellent communication skills with my professors, people and colleagues. As a necessity born of circumstances, I have worked and work very well in a group, exchanging ideas and giving my contribution. I can also communicate freely with the general public and present and defend my ideas whenever necessary. I understand the ideas of others and I tend to always be cooperative and honest, listening and accepting any different idea or opinion. Very good communication skills gained from my work experience as a Veterinarian, Assistant Lecturer and participation in several projects and studies abroad.

Organizational/managerial skills

I have good management skills as I have had to be part of many groups and projects. Managing more than thirty people (students) in professional internships or managing students in projects and school assignments are some examples. Working as a teaching assistant has given me the opportunity to manage many situations with colleagues, students and other people inside and outside the department where I develop my professional activity.

Job-related skills

I strive to fulfill my duties and responsibilities to the best of my ability and learn as much as possible from all the tasks and commitments that I am assigned. Working as an assistant lecturer has provided me with the opportunity to prepare and deliver university lectures as well as to draft or assist in the completion of academic projects and articles.

Computer skills

Excellent Windows computer skills: Word, Excel, Power Point, Access; Statistical packages such as SPSS.
